

# XDocs WEX

Browser based content creation and review made easy.

Accurate documentation development relies on SME (Subject Matter Expert) contribution, but within a DITA workflow this has always proved difficult.

SMEs do not have the time to learn XML authoring and so Teams have had to rely on PDF mark-up, MS Word track-changes, or email exchanges. These approaches are slow and can also lead to errors leading to another review cycle.

Bluestream WEX lets all parties involved in content creation contribute in a meaningful way. With WEX SMEs can quickly review and approve content, share ideas and much more all in a simple web browser.

### End-to-end

XDocs provides a complete solution. Your content team can create, review, find, update, manage, localize and deliver content with unparalleled agility.

### Solutions for all your content challenges

Delivering content for different audiences, languages, and publish outputs is easy. Delivery is agile, automated, and responsive.

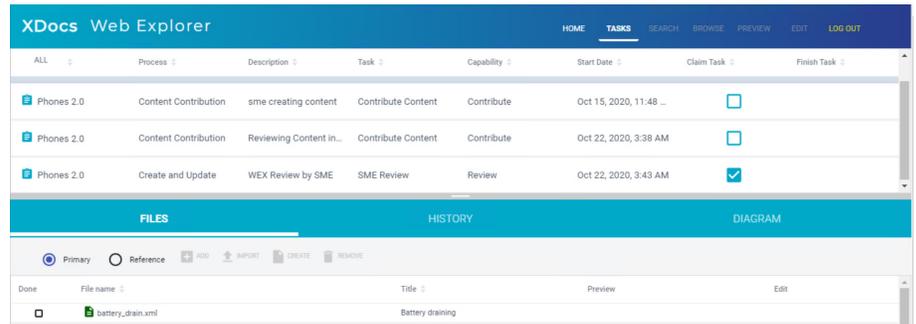

### Easy-to-deploy

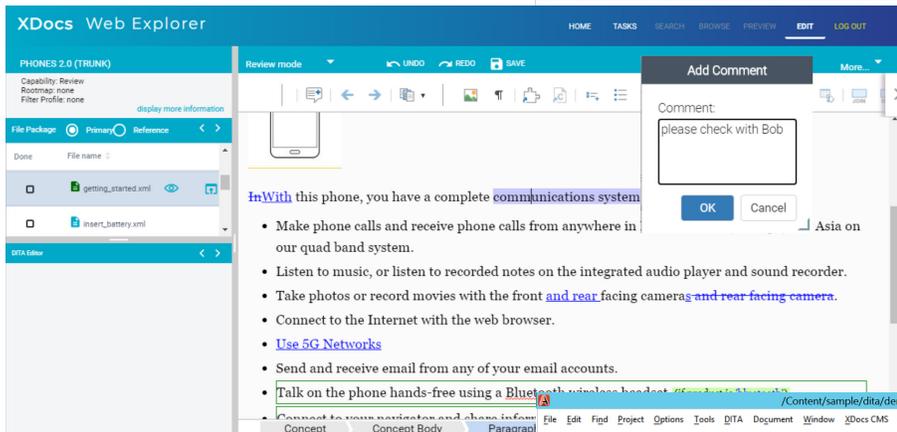

Out-of-the-box XDocs is fully functional and feature rich. Customization is simple and it can be installed and deployed in hours.

WEX is a web-based application for the online review and contribution of DITA content. The premise behind the app's development is simple – no training or installation required. The target audience for this application is anyone in the organization who needs to be part of the content lifecycle.

With WEX SMEs can be notified by email when their input is required. A simple interface displays outstanding tasks.

ALL	Process	Description	Task	Capability	Start Date	Claim Task	Finish Task
Phones 2.0	Content Contribution	sme creating content	Contribute Content	Contribute	Oct 15, 2020, 11:48 ...	<input type="checkbox"/>	
Phones 2.0	Content Contribution	Reviewing Content in...	Contribute Content	Contribute	Oct 22, 2020, 3:38 AM	<input type="checkbox"/>	
Phones 2.0	Create and Update	WEX Review by SME	SME Review	Review	Oct 22, 2020, 3:43 AM	<input checked="" type="checkbox"/>	

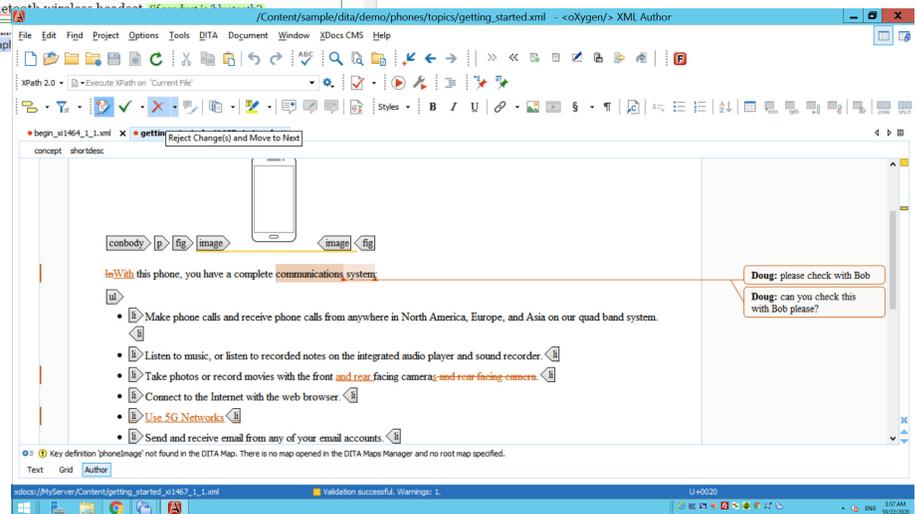

The screenshot shows the 'Review mode' interface. On the left, there's a sidebar with 'PHONES 2.0 (TRUNK)' and a list of files including 'getting\_started.xml' and 'insert\_battery.xml'. The main content area displays a document snippet with an image of a phone and a paragraph starting with 'InWith this phone, you have a complete communications system...'. An 'Add Comment' dialog box is open over the text, with the comment 'please check with Bob' entered.

Marking up changes and adding notes replicates the experience of standard authoring applications and no additional learning is required.

All mark-up and annotations are created as DITA and are immediately viewable by other Users and on other tools. Such as the Technical Author using desktop Oxygen Author.

With WEX anyone can create new DITA Topics – without the need for additional training.

WEX solves the problem of how to include SMEs and others in the in the content workflow.

The screenshot shows the Oxygen Author desktop interface. The main window displays the same document snippet as the web interface, but with DITA markup visible. A comment box is attached to the text, containing the text 'Doug: please check with Bob' and 'Doug: can you check this with Bob please?'. The interface includes various toolbars and a status bar at the bottom.
