XDelivery™

easily build portals and turn your content into engaging user experiences

Help your customers succeed — empower them with simple, easy dynamic access to your current product content, and at the same time reduce the burden on your technical support and training teams.

Benefits

- A single location for consumers to access all your approved content.
- Increase the visibility of your approved content, topics and publications and provide 24/7/365 instant access.
- Reduce the cost of publishing, storing and distributing information.
- Improve both the pre-sales and post-sales user experience by providing intuitive self-service capabilities.
- Improve internal access to approved content and knowledge assets.
- Increase revenue by linking content assets to a fulfillment system.

Enterprise class content delivery from an enterprise class CCMS

XDocs DITA CCMS provides all the tools and benefits of intelligent, structured content – efficiency in creating, updating, and managing source language and translated content – and now XDelivery provides parallel efficiency in delivering your content to your customers – and all your other content consumers.

End-to-end

XDocs DITA CCMS provides a complete solution. Your content team can create, review, find, update, manage, localize and deliver content with unparalleled agility.

Solutions for all your content challenges

Delivering content for different audiences, languages, and publish outputs is simple. Delivery is agile, automated, and responsive.

Easy-to-deploy

Out-of-the-box XDocs DITA CCMS is fully functional and feature rich. Customization is simple and it can be installed and deployed in hours.

XDelivery publishes feature-rich content directly from your XDocs DITA CCMS:

Configure XDelivery with ease to build your own self service portals

Package your product content with your brand and style.

- Ensure a constant look and feel across all your content assets and strengthen your brand identity.

Automatic Publishing

- Pull approved content directly from your source server and publish individual topics, or whole publications for any device or platform.

Designed for all types of user

- Interact with internal and external content consumers; customers, prospects and employees.
- Control who sees what with configurable user permissions and full support for single sign-on.

Designed for all types of content, not just DITA

XDelivery has the power to capture all your knowledge resources (quick start, product specs, user guides, training, support, marketing and more). It then allows you to efficiently update and share them with your customers, prospects and your internal content consumers.

- Batch/bulk upload and fully index your unstructured content and legacy documents including PDFs.
- Display your multimedia and multilingual content.
- Let your content adapt to the screen size.

Designed to work with other systems

Some information will always exist on other systems/platforms. A full set of RESTful APIs allows XDocs DITA CCMS and XDelivery to connect to almost any system.

- Integrate with JIRA, Salesforce, Zendesk, PLM, ERP systems and other tools in your content lifecycle.
- Search all resource locations simultaneously for relevant content and publications with advanced search capabilities.

With XDelivery you have complete control over how you publish your knowledge assets.

It has never been easier to share information with your customers, prospects and employees.

Control every step of your content life-cycle with unparalleled agility.

XDocs DITA CCMS provides you with an enterprise end-to-end content solution.
